BETTER POLICY, FASTER

Science & Technology Policy Fellows are professional scientists holding PhD's in their respective fields. Fellows bridge the gap between legislators and scientific experts.

Other states have already implemented science policy fellowships and comprise a robust national support network

Transportation, Public Safety, and
Energy Policy Fellow at MOST
Policy Initiative

INVEST IN KENTUCKY

The Kentucky Academy of Science is seeking partners to fund and implement science and technology policy fellowships in Kentucky

KAS is a 501(c)(3) non-profit scientific organization with 4000+ members. Our mission is to catalyze scientific communication and collaboration to improve research, education, and public engagement with science in the Commonwealth of Kentucky.

Key Fellowship Benefits

Expert Insights

Fellows offer specialized knowledge on complex science and technology issues

Data Analysis

Fellows provide crucial analysis for evidence-based policy making.

Connecting to Scientists

Fellows call in other scientific perspectives when needed
